

## Vaccination Schedule

North Seattle Veterinary Clinic veterinarians recommend the vaccine schedule published by the American Animal Hospital Association. Your veterinarian will discuss which vaccines are appropriate for your pet given your family's lifestyle.

Here is a summary of this schedule:

### **PUPPIES:**

DAPP: Starting between 6-8 weeks, repeated monthly until 16 weeks. Minimum of two doses given, may be up to 4 doses depending on age.

Rabies: 1 dose at 16 weeks

Bordetella: 1 dose any time after 8 weeks

Leptospirosis: 1 dose at 12 weeks, 1 dose at 16 weeks

Influenza: 2 doses anytime after 12 weeks. Often started separately after completing core series.

### **ADULT DOGS:**

After the puppy vaccines are completed, all vaccines are given 1 year later.

After the initial 1-year boosters:

DAPP: Every 3 years

Rabies: Every 3 years

Leptospirosis: Annually

Bordetella: Annually

Influenza: Annually
